CAREER OBJECTIVE

Detail oriented and Creative Front-End web developer with 5+ years of experience, including 2+ years professionally. Expert in full-stack web applications. Former Front-end developer at Ozmo Inc., now a Systems Engineer at Infosys Inc. Known for reliability and teamwork.

EDUCATION

B.S in Computer Science – Graduated on May 2022.

Virginia Polytechnic Institute and State University
Blacksburg, VA

WORK EXPERIENCE

Webmaster – WebD-VT, Blacksburg, VA

Aug 2018 – September 2020

(Student organization at VT dedicated to hosting full-stack web development workshops and hackathon preps)

- Worked with a team of 4, used JS, HTML, GitHub and Git Bash to clone and update webdvt.org web page.
- Conducted workshops to tutor JavaScript (Vanilla) and CSS.

Associate Web Developer – Ozmo Inc. , Blacksburg, VA

Aug 2020 – Dec 2020

(Mobile device support platform that helps mobile operators to solve device software issues)

- Collaborated with the squad lead and team to maintain workflow using JIRA boards, SVN and Airtable.
- Developed UX and Front-end for smartphone screens using JavaScript, Figma and XML.

Systems Engineer – Infosys, Indianapolis, IN

July 2022 – present

(IT, digital services, and consulting company)

- Developed and maintained different web pages of Helix Hub platform using Angular (Front-end).
 - Adhered to web design standards by synergizing with the UX team, utilizing Figma for page creation and workflow enhancement.
 - Recipient of the **Rise Insta** award (2023) for contributions toward Helix Hub project and design-oriented development.
 - Collaborated with diverse teams, adeptly navigating Agile methodologies, Scrum workflow, and JIRA boards. Leveraged Git Version Control System for efficient code management, ensuring project integrity and seamless collaboration across versions.
- Collaborated with Tenant OPS on the Large Group Intake tool (LGIT), using Angular for front-end design while learning MySQL for database management and Azure.
